REPORT

on the teaching programme of the

MASTER IN ADVANCED EUROPEAN AND INTERNATIONAL STUDIES ANGLOPHONE BRANCH

Academic Year 2009-2010

The programme of the M.A.E.I.S. – Anglophone branch took place :

- from **October 13th, 2009 until December 18th, 2009**, at Istanbul Bilgi University in **Istanbul**,
- from **January 8th, 2010 until March 26th, 2010**, at the Institut Européen des Hautes Etudes Internationales in **Nice**,
- from **March 31st until May 21st, 2010**, at the Institut für Europäische Politik, **Berlin**.

For the academic year 2009-2010, we designed our study programme in order to enable students to analyse international developments, a focus being the process of European integration and the questions linked to the enlargement of the European Union.

The multidisciplinary of our programme aimed at introducing a unique approach, enriching students' knowledge and understanding of major change in world politics and the meaning of European integration. During the stay in Berlin, lectures focused on the EU's external relations and its role in the world.

Furthermore, students benefited from the high quality of libraries in Berlin in order to do their research work. Therefore, students were encouraged to acquire a better understanding of contemporary problems of European Integration as well as world politics.

ORGANIZATION OF THE PROGRAMME

THE MODULES

The lectures and the research were composed of four basic, obligatory modules.

For each module, an I.E.H.E.I. professor was in charge of developing the curriculum and teaching. University teachers, namely from French, German and Turkish universities, experts from International and European organisations as well as researchers from our partner institutes also contributed to our programme.

Various teaching methods were applied within each module: lectures, conferences, seminars, "round tables", debates and discussions. International colloquia or longer seminars that were open to a larger public were also organised for certain modules.

1. INTERNATIONAL RELATIONS (98 hours)

under the direction of Mrs Dagmar RÖTTSCHE-S-DUBOIS, Director of the M.A.E.I.S. - Trilingual branch, D.A.A.D. lecturer.

The collapse of the block system has aroused a basic need to question the world order. Without creating a new international system, new actors, new focuses and new challenges have disordered the rules of the game. The hypotheses for the elucidations of Huntington, Fukuyama, Rufin, Brezezinski and other actors in charge of super powers are at times discarded, at times affirmed by the international events. And the new structures which are indicated appear just as well appropriate as doubtful.

The target of this module is to emphasise the ongoing directions in the international relations through the analysis of their development, particularly since World War II. Theories which have developed during this period will be studied and the emergence and impact of new actors, economic such as others, will be examined in the context of globalisation.

The changes in international violence, as they appear in conflicts of the new generations, provide a specific aspect for the superior understanding of today's international realities.

2. ECONOMY AND GLOBALISATION (47 hours 45 min.)

under the direction of **Mr. Laurent BAECHLER**, Senior Research Fellow at the Centre International de Formation Européenne (CIFE)

The main goal of this course is to give a broad overview of the fundamental logics behind the process of economic globalisation, without going to much into the details of economic theory. In order to explain the long term growth and development processes, the course will explore the role of the key factors shaping the world economy. World trade will thus be studied to understand its main driving forces, with a focus on the international trade negotiations. Financial markets will be explored to shed a light on their contribution both to long term development and major economic crisis.

Another goal of the course will be to understand how globalisation also refers to the problem of international economic governance, with its institutions, actors and processes.

4. EUROPEAN INTEGRATION (160 hours 15 min.)

under the direction of **Mr. Matthias WAECHTER**, Director of the I.E.H.E.I.

The new Europe, which emerges since the fall of the Berlin wall, is confronted with major problems. The common currency has been realized, but the institutional framework still stays unsatisfactory, a European constitution is missing and the integration of new member states remains a major challenge. The seminar has to familiarize the students – future European and international elites –with the great transformations, the challenges and the problems of European integration, in particular related to political and institutional reforms and the Eastern and Southern enlargement.

Following an interdisciplinary approach, juridical, political, economical and cultural aspects, which are indispensable for the understanding of the subject, will be included.
